

Training and Consultancy Service

- 1 in 3 people with a learning disability have a sight problem
- People with learning disabilities may not know they have a sight problem and they may not be able to tell others
- Unidentified sight problems can seriously undermine quality of life and lead to avoidable sight loss and increased dependency

SeeAbility delivers a range of training and consultancy services for health and social care staff and for people with learning disabilities.

**These are
the courses
we can offer**

Go see to it!

A course for support staff about understanding the eye care journey for people with learning disabilities.

Functional vision assessment

A course for support staff to enable them to assess the functional vision of people with learning disabilities using our assessment tool.

Eye examinations

A course for optometrists about adapting the eye examination to meet the needs of people with a learning disability.

Skills for life

A course for support staff about daily living skills for people who have learning disabilities and a visual impairment.

My eyes and vision

An accessible and interactive course for people with learning disabilities to learn about eye care and visual impairment.

Recognising potential

A course for Rehabilitation Officers about adapting their assessments and techniques to meet the needs of people with a learning disability.

We can provide the following consultancy services for commissioners of learning disability, eye care and visual impairment services:

- Developing enhanced optometry services for people who have learning disabilities
- Reviewing and reporting on the effectiveness of eye care services for people with learning disabilities in a geographical area
- Setting up specialist projects
- Environmental audits or building and design advice

We also provide direct support for people with a learning disability:

- Preparing for and attending an eye test or eye surgery
- Functional vision assessments
- Rehabilitation assessments
