

These are the essential things to think about when supporting people with learning disabilities.

Think vision

People with learning disabilities are much more likely to have sight problems. But many are not getting the eye care they need.

Have a sight test at least every 2 years

You often can't tell if someone has a sight problem. The only way to know for sure is a regular sight test.

Wear the right glasses – and look after them

6 in 10 people with learning disabilities need to wear glasses. People need the right glasses for the right task and support to get used to wearing them. Glasses should be kept clean and well maintained.

Get the right support

The right support to manage eye conditions and live with sight loss is essential. This could include:

- Access to treatments and eye surgery
- Support to make the best use of someone's vision
- Specialist equipment and support for people living with sight loss

SEE ABILITY
Extraordinary every day

Vision Passport

Information about my sight

Please fill in my Vision Passport and share it with those who support me. It will help you understand me and how you should support me.
